## THE MILAN CHAMBER OF COMMERCE

The Milan Chamber of Commerce is an autonomous public entity that performs the following functions:

- Registration and control of all businesses in the province of Milan
- Market monitoring and regulation
- Promoting the general interests of the provincial economic system

The Chamber is governed by a board of directors comprised of representatives of all sectors of the economy, trade unions, and consumers. The board of directors elects its own chairman, who has strategic decision-making duties. The President is responsible for managing and running the organizational structure.

The Company Register of the province of Milan includes 380,000 businesses operating in the sectors of agriculture, handicrafts, industry, commerce and services.

With about 900 employees and a budget of 172 million euros, it is organized into a central holding company and 6 special agencies which have the task of providing special services to businesses.

The programs and activities of the Milan Chamber of Commerce are aimed at enhancing the entrepreneurial fabric that has made Milan economically strong and competitive at international level. Through Promos, the Milan Chamber of Commerce provides a positive picture of the territory's economic and institutional strong points by promoting the Milan system in foreign markets.

There are various types of actions for the promotion of economic development, such as direct contributions to enterprises, a wide range of market regulatory activities, financial information, entrepreneurial training and the promotion of infrastructures and quality, the implementation of which is also thanks to the specialized contribution made by the Special Agencies.
